

I am writing today because my 13 year old son receive information in the mail today and ask me to do this, the K-LOVE radio station is very important to him. He listens to it at night when he goes to bed, while riding in the car and has it on through out our home when ever possible.

K-LOVE radio is extremely important to the listening community and we believe the LPFM should not be given the ability to override the FM stations, as it is highly possible that the offerings would fall far below what K-LOVE offers now. That is wholesome values that encourage families in a positive way all across America. Stations like K-LOVE are in the best interest to the public, as I stated previously, they offer wholesome values, no bad language or put downs of any person(s) or people groups, promoting life and not death, as so much music does these days. We believe these values need to be left on the air for others to listen to and be impacted in a positive way.

Thank you for this opportunity and your time,
B Ganschow, Oklahoma City, OK
